Voice Controlled Chess

Rule Book

- It is a single player game.
- You may get white or black and it is completely random.
- You may change the color of the board by pressing 'c'.
- Start the game by a mouse click.
    - Then make your move
    - Moves are in the form of 2836 where 28 is the original position (2 is the column and 8 is the row number) of the piece and 36 is the position (3 is the column and 6 is the row number) where it must be moved.
    - You can also use chess board notations like B8C6 where B8 is the initial move and C6 is the final move. (If this don't work sometimes you can use the above mentioned format)
- If you give an invalid move or any other word different from the given format it will ask you to make a move once more.
- If you are stuck and cannot decide which move to make you can simply press 'h' and a good move will be played from your side.
- Press 'q' to quit the game.
- Press 'p' or 'd' to get the move list of the game.
- Press 'e' to evaluate the score.
- Press 'u' to UNDO your move
